SAVING LIVES IN SIERRA LEONE

Crown Agents is delivering one of DFID's flagship health programmes in Sierra Leone as part of an International Rescue Committee-led consortium.

The Saving Lives Phase II programme supports the Government of Sierra Leone (GoSL) to save women's and children's lives by improving the quality, availability and accessibility of reproductive, maternal, newborn and child health services. Crown Agents is leading the supply chain component of the programme, providing technical support to: the GoSL; the Directorate of Drugs and Medical Services and the National Medical Supplies Agency on supply chain management.

What we offer

- End-to-end supply chain solutions from port/warehouse to all any destination nationwide
- Scalable costing model - only pay for what you need per month resulting in reduced net costs
- Improved value for money with costs spread over multiple partners without compromising on reliability and confidence
- Internationally recognised security team and systems minimise pilferage losses whilst continually identifying opportunities for improvement
- Increased visibility and accountability through on-demand stock reporting
- Insurance - tailored to your requirements
- Improved donor reporting - with costs visible per project these can be broken down as required

FIGHTING EBOLA IN SIERRA LEONE

As part of the UK Government's response to the Ebola Crisis in Sierra Leone, Crown Agents rapidly established and managed an Ebola essential health care platform. We mobilised over 20 supply chain specialists to produce an end-to-end supply chain network for procurement, warehouse management and distribution. Within 72 hours, we purchased 600 line items to set up the first Ebola Treatment Centre (ETC) in Freetown. We procured, transported, stored and distributed over 10 million individual items from over 240 suppliers including pharmaceuticals, laboratory supplies, personal protective equipment and infrastructure. We supplied more than 2 million kilos of products using both air and sea freight.
